ISLAMIC BANKING MARKET IN OMAN

As a new industry in Oman all the participants are clearly working towards the progression and the success of Islamic banking. The five conventional banks with window operations and the two full-fledged Islamic banks, including Bank Nizwa are starting to see the results of the hard work and investments into products, technology, branches and communication. We, as Bank Nizwa, in our capacity as one of the Banks offering Sharia compliant products and services, continued to work on two areas that will yield the results that we desire. We are committed to:

1. Creating awareness about the industry and its procedures with the population at large, and with corporates licensed to operate in the country. We are pleased that our efforts are providing the results we desired with the consumer, and are now seeing the results of time invested in working with the corporate segment.
2. Continuing to increase our distribution network with branches, kiosks and alternative channels across the Sultanate particularly in areas outside the major cities.

FINANCIAL PERFORMANCE

The financial results of the second quarter ended 30 June 2014 reflect the results of our efforts and the overall performance of the Islamic banking market in the Sultanate.

The total assets of the Bank as of 30th June 2014 reached Omani Riyals 236 million which represents a 39% growth over same period in 2013.

During the half year, growth in our financing and deposit portfolio over the results of December 31, 2013 has provided us the momentum that we needed to continue our growth trajectory. This momentum will enable us to achieve our long term objectives. During the half year our financing portfolio grew 149%, whilst the Islamic deposit portfolio grew 116%.

During the quarter we also brought to the market new propositions for our retail clients and enhanced the corporate product offering by building on the trade finance platform, and we continued investing in our critical resources which includes our people, started on new branches and technology that will enable us to better serve our customers.

During this quarter, our total revenues grew 9.20% over previous quarter with expenses increasing by 1.43%, as our financing and investment portfolio grows the growth in revenues will be adequate to offset the operating expenses being incurred. This will result in the cost to income ratio declining to a level that is in line with the established banks.

THE YEAR AHEAD

Since our launch, we have focused on building our brand awareness and value. To that end, we will increase our customer base, increase our distribution foot print by additional 5 to 6 branches, enhance our product and proposition offering and bring banking to our customers' doorstep and fingertips. We have believed in innovating to deliver to our customers which will continue in all our activities, in addition we continuously explore and research ways to give back to our customers and community to that end we launched the successful cash back campaign on the debit card and the Ramadan lower profit campaign for auto finance. In the coming quarters other exciting products and propositions will be launched.

We will continue to drive profitability across business segments by increasing our consumer customer base to enable cross-sell, and provide solutions for every life stage of our customers. In wholesale banking segment, we will further build our product offerings to provide comprehensive client solutions, leveraging on the existing expertise in treasury, investment banking and trade finance, having successfully established retail banking the remainder of the year will be driven by wholesale banking achievements.
